

Fall 2016

In September 2016, the AIA released important enhancements to the ACD Online Service (ACD5). This newly enhanced application includes a more robust online editor, which does not require additional components to be installed on your desktop such as Java Plug-in technology.

Key features and benefits of the enhancement release include:

- Performance improvement – opening and editing documents online is faster
- Multi-browser support – works with all major browsers such as Mozilla Firefox, Google Chrome, Microsoft Edge, Microsoft Internet Explorer 11, and Safari for Mac. For the best experience, use Mozilla Firefox or Google Chrome.
- Updated layout of online editor menu – includes a new streamlined and updated user-friendly interface with all the necessary actions under Home tab.
- No longer requires Java Plug-in Technology

These enhancements were driven by customer feedback. We appreciate your input, and will continue to improve the product to better meet your needs.
